FCC, please leave XM Radio alone. They are providing a superior service which I choose to pay for. They should be allowed to broadcast local content. I have been nothing but satisfied with their services to date. I find it ironic that the NAB has been running commercials on the air that millions of customers of satellite radio have cancelled their subscriptions because they find no value in the service; but the opposite is true. We are happy with the service!!! I have never heard a commercial on XM Radio that said to stop listening to broadcast radio because of all the commercials, XM has taken the high road. The NAB is apparently scared of new technology. PLEASE let me receive all benefits of the product I pay for.

Thank You for LISTENING,

Jarell Gosch
